Summary

B.Tech Information Technology student (6th semester) with strong skills in Python, Machine Learning, SQL, Data Structures and Algorithms. Experienced in building ML models, data analysis, and software projects.

Education

Techno Main Salt Lake	Kolkata (2023-2027)
Bachelor of Technology (B.Tech)- Information Technology	
CGPA: 7.5/10 (till Semester 5)	

Technical Skills

- **Languages:** Python, Java, C, C++
- **Machine Learning:** Supervised & Unsupervised Learning, Scikit-learn, TensorFlow, Pytorch, Keras
- **Data:** SQL, MongoDB, Pandas, NumPy
- **Development:** HTML, CSS, JavaScript, Flask, Git, GitHub
- **Core CS:** Data Structures, Algorithms, OOPs, OS, DBMS

Projects

<u>Smart Bloom-</u> Vertical Farming Rover	(August 2024)
• Developed an automated vertical farming rover using Arduino and ESP32-CAM, • Enabled real-time plant monitoring and cross-pollination with 90% detection accuracy using YOLO-based CV models.	
<u>Silent Speak-</u> Assistive App	(November 2024)
• Developed an assistive mobile application using Flutter, Firebase, Python, and Arduino that enables Morse-code-based communication for speech-impaired users.	

Certification

Data Science & Machine Learning using Python – CodeWithHarry	Completed (February 2026)
• Learned fundamentals of Data Science, ML, Deep Learning, and LLMs using Python, NumPy, Pandas, Scikit-learn, TensorFlow, and SQL.	
Machine Learning using Python – Simplilearn	Completed (November 2025)
• Completed hands-on training covering supervised and unsupervised learning, data preprocessing, model training, and evaluation using Python.	

Academic Projects & Practical Experience

Machine Learning Projects
• Developed machine learning models for classification and regression using Scikit-learn Achieved 85% accuracy. • Performed data preprocessing, feature engineering, and model evaluation on real-world datasets with 10,000+ records. • Analyzed model performance using metrics such as accuracy, precision, and recall.
